

Legal data available from Croatia

Legal events from Croatia (country code HR) are available for the first time via the INPADOC worldwide legal event data. The Croatian Patent Office will deliver the data now on a regular basis.

Data available includes information on the discontinuation of applications, on the grant and discontinuation of IP rights, party data changes and the payment of maintenance fees.

Data covered goes back to 1994 and will be uploaded on bi-weekly basis. SPC data is not covered yet, but the EPO is working on the exchange of the SPC data for Croatia soon.

55 legal event codes from Croatia are available for the time being. The table lists the legal event code, the legal event description in English and Croatian, the influence indicator if available and the legal status category.
